

# JOHN-HENRY 2A

Step 2 of Two-Step Wash System

## Product Description

**JOHH-HENRY 2A**, the second step in the **Two-Step Wash System** is formulated to remove road film, exhaust deposits, light oils, and bug residues from the painted surfaces of trucks, buses, and heavy equipment. This product works in hot or cold water and rinses freely leaving no soap scum. The materials used have been selected for their synergy in expediting the desired "split" between oil and water into two phases. Additionally, a built-in corrosion inhibitor dramatically reduces oil / water separation time, and enhances soil and solids settling. This unique formulation reduces oil emulsification and softens water to enhance cleaning power. Used in combination with **JOHN-HENRY 1** (or **1AS**) Acid Pre-Washes, **JOHH-HENRY 2A** will not harm pressure washing equipment, and contains no phosphates, dyes, perfumes, or thickeners. All surfactants are biodegradable.

Introduction of this **JOHH-HENRY 2A** in a zero-discharge recycling system progressively enhances the cleaning power of the available wash water, as it is miscible in water, and will not be skimmed off with oil in a separator.

## Uses & Directions

**JOHH-HENRY 2A** is generally used through **Two-Step Wash System**, and is designed to be diluted 25:1 with water. If used as a prep of any kind, at a stronger dilution than what is recommended, special attention should be given to cosmetically sensitive surfaces. Try it in an inconspicuous area first.

# SDS

## Health Hazard Summary

Causes moderate to severe irritation and possibly burns to eyes. Prolonged exposure may irritate skin. Mists or sprays may irritate eyes, nose, and throat.

## Specifications

|                           |                   |
