

STRIPPER 99

Paint, Varnish, and Resin Stripper

- **Non Flammable**
- **Low Evaporation Rate**
- **Water Rinsable**

Stripper 99 is a "state of the art" paint and finish remover for the next century. It contains no chlorinated solvents, and is a low VOC product. Superior resin removal for high density crosslinked polymer systems, non-crosslinked, such as varnish and lacquer, and even polyurethanes. Dissolved resins are easily rinsed with water.

Use Stripper 99 for the effective removal of alkyd polyurethane enamels, nitrocellulose lacquers, acrylic enamels, straight chain acrylic floor sealers, and a variety of set-up materials such as MDI and TDI in the tank washing industries.

Use as is. Do not dilute with water, as it will diminish Stripper 99's ability to solvate the aforementioned materials. Allow to stand for 20-30 minutes. Rinse with water while scrubbing the effluent, or pressure wash off.

SPECIFICATIONS FOR STRIPPER 99

| | |
|--------------------------|----------------------------|
| Appearance..... | Clear, viscous liquid |
| Odor..... | Mild, amine |
| Specific Gravity..... | 1.028 |
| pH..... | 7.7 |
| Flammability..... | Non-flammable |
| Methylene chloride..... | None |
| Evaporation rate..... | Very low |
| VOC's..... | Very low |
| Solubility in water..... | Complete |
| Dilution..... | Use as is |
| Coverage..... | 200-400 sq. ft. per gallon |
| Biodegradable..... | Yes |
| Storage Stability..... | Excellent, 1 year minimum |

| HMIS RATINGS | | | |
