

TANKMASTER FG

Aluminum Safe Food Grade Detergent

TANKMASTER FG is a powerful concentrated internal tank wash detergent for food grade applications. Can be used safely on all metals, and will perform well even with hard water. Contains a high concentration of wetting agents, alkaline builders, and water softening agents that break up, disperse, and saponify grease, grime, and dirt. This product does not contain solvents, phosphates, perfumes, or thickeners. All surfactants are biodegradable. Non-corrosive, non-flammable.

Use TANKMASTER FG for internal food grade tank washing operations as a recirculation detergent or as a "Virgin Wash." Use on road tankers, tank containers, and IBC's.

For tank cleaning with a recirculation system, pre-mix a 3% solution (by volume) of TANKMASTER FG. For best results, wash should begin at 195° F. Food grade sanitations may require a follow-up rinse at temps greater than 180° F.

For steam cleaning or pressure washing apply through injector at 1-2% by volume.

SPECIFICATIONS FOR TANKMASTER FG

Appearance.....	clear, water white liquid
pH.....	13.2±.5
Specific Gravity.....	1.03
Flash Point.....	None
Dilution.....	Up at 3% with water
Foam.....	Moderate. None above 140°F
Hardwater Tolerance.....	Excellent
Ammonia.....	None
Butoxyethanol.....	None
Other Solvents.....	None
Phosphate.....	None
Storage Stability.....	Excellent, indefinite
